About me

I'm a software engineer with experience developing complex, high profile web applications collaborating with both small and large teams. I specialize in JavaScript, thriving in an agile environment leveraging modern technologies such as VueJS and Angular. I pride myself in writing scalable, elegant code — creating simple solutions to complex problems.

Skills

- JavaScript
- Node.js
- TypeScript
- HTML
- CSS / SCSS / LESS
- VueJS
- Vuex
- Angular
- Loopback
- Ionic
- Responsive Design
- TDD
- Agile
- Express
- MongoDB

Experience

Neosoft Technologies - Mumbai, India

Software Engineer (June 2019 - Present)

Projects

Pepperstate

PepperState is a crowdfunding platform where investors can invest in the projects created by borrowers.

Website

- I was assigned to this project in mid of the development phase.
- I am handling both frontend and backend of the application.
- Technologies used for frontend are: HTML(pug), CSS, JavaScript, VueJS, NuxtJS, SASS preprocessor, Element UI for UI components.
- Technologies used for backend are: NodeJS, Express, GraphQL, MongoDB.
- Git and Bitbucket are used as version control tool and repository hosting service respectively.
- Jira is used as software management tool.

Collecticity

Collecticity is a crowdfunding platform where investors can invest/donate in the projects created by borrowers.

Website

- I was assigned to this project after it was launched.
- I am taking care of bug fixes and minor changes as required.
- Recently i have moved e-contract signature API to a separate micro-service which is built with NodeJS and NestJS.
- Technologies used for frontend are: HTML, CSS, JavaScript, AngularJS v1.5.5, Grunt, Gulp.
- Technologies used for backend are: NodeJS, Loopback, MongoDB.
- Git and Bitbucket are used as version control tool and repository hosting service respectively.
- Jira is used as software management tool.

Skillocial

Skillocial is a Social Media platform for Hip Hop Community.

Website

- I have built this application from scratch.
 - UI was built by major focusing on mobile version as its hybrid application which is build for Web(PWA), Android and IOS platforms.
 - Technologies used: Angular, Ionic, HTML, SCSS, Typescript, Firebase, MongoDB realm.
 - Git and Bitbucket are used as version control tool and repository hosting service respectively.
 - Jira is used as software management tool.
-
